

Introduction

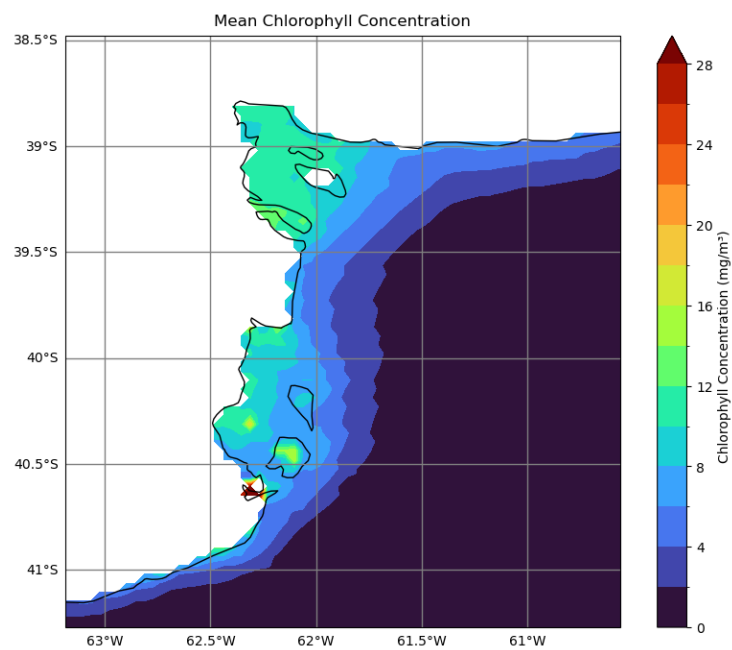

The region chosen is (,), which is a region of the Eastern coast of Argentina. The reason for the region is that it displayed high chlorophyll concentrations due to the () current.

Bathymetry map

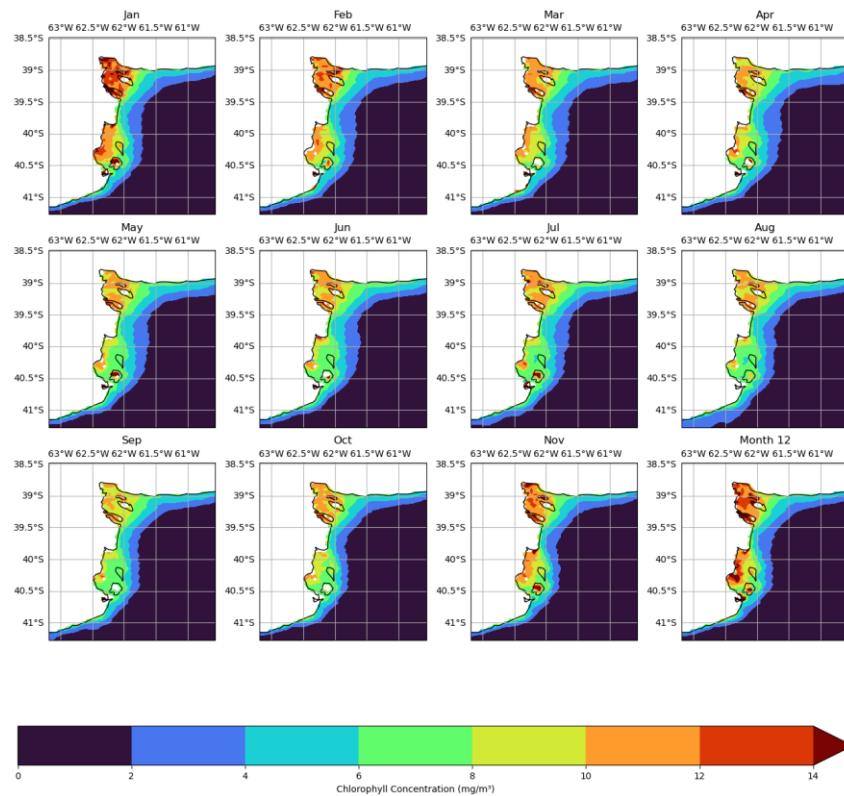

The above map is a bathymetry map of the region, showing the ocean depth.

Mean annual chlorophyll

The above map shoes the annual mean chlorophyll concentration of the region.

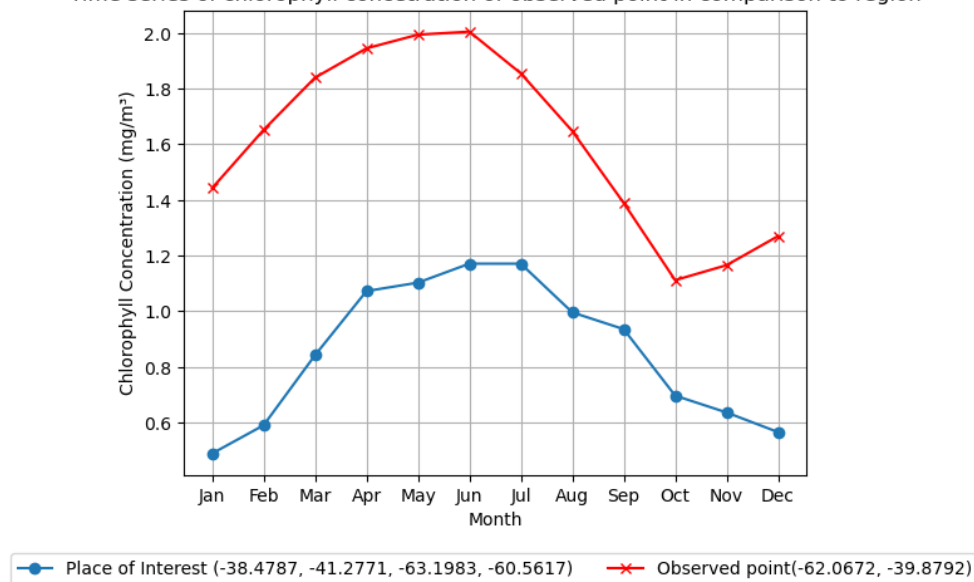

Monthly mean chlorophyll

The above maps show the monthly mean chlorophyll concentration in the region.

Time series

Time series of chlorophyll concentration of observed point in comparison to region

Time series showing the annual mean chlorophyll concentration fluctuation of a point of interest compared to the regional annual mean chlorophyll concentration.
